

Hunter Oil Corp.

Management's Discussion & Analysis

Nine Months Ended September 30, 2018

DATE AND BASIS OF INFORMATION

Hunter Oil Corp. (the "Company") is incorporated in British Columbia, Canada and is engaged in the business of acquiring and developing crude oil and natural gas properties. On August 31, 2018 the Company disposed of all of its business operations as discussed below. The Company is currently evaluating potential interests in oil and gas properties and other business opportunities in the oil and gas industry.

The Company's head office is located at Suite 940, 1040 West Georgia Street, Vancouver, British Columbia, V6E 4H1 Canada. Common shares of the Company are listed on the TSX Venture Exchange under the symbol "HOC" and quoted on the Over the Counter marketplace under the symbol "HOILF." Additional information relating to the Company can be found on the SEDAR website at www.sedar.com.

Until August 31, 2018 the Company was engaged in the operation of crude oil and natural gas properties in the Permian Basin in eastern New Mexico, United States. On that date the Company closed a Purchase and Sale and Share Purchase Agreements with Pacific Energy Development Corp. ("Purchaser") in which certain subsidiaries of the Company sold (the "Transaction") substantially all the Company's oil and gas operations and related assets (the "Assets") located in the Permian Basin, eastern New Mexico. The Purchaser also agreed to assume all retirement obligations associated with the Assets.

The Company is actively seeking to locate, evaluate and where advisable negotiate to acquire interests in oil and gas properties, or pursue other business opportunities in the oil and gas industry. There is no guarantee that the Company will be able to identify suitable oil and gas prospects, or that the Company will be able to negotiate acceptable terms for any prospects that it identifies. The TSX Venture Exchange may transfer the Company to the NEX, a separate board of the Exchange, if the Company fails to meet ongoing minimum listing requirements.

Liquidity and Going Concern

These unaudited interim condensed consolidated financial statements are prepared on the basis that the Company will continue to operate as a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the twelve-month period following the date of these consolidated financial statements. The Company has an accumulated deficit of \$119.0 million and a working capital of \$1.9 million as at September 30, 2018.

Although the Company has no current operations nor remaining assets, the board of directors is actively seeking a transaction(s) whereby it will continue as a going concern. Therefore, these financial statements are presented on a going concern basis of accounting.

The unaudited interim condensed consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption deemed to be inappropriate. These adjustments could be material.

Basis of Presentation

The following Management's Discussion and Analysis ("MD&A") is dated November 27, 2018 and should be read in conjunction with the Company's consolidated financial statements and related notes for the three months ended September 30, 2018, as well as the consolidated financial statements and related notes, and MD&A for the year ended December 31, 2017. The referenced consolidated financial statements have been prepared by management and approved by the Company's Board of Directors. Unless otherwise noted, all financial information presented herein has been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

All financial information is in US dollars, unless otherwise indicated.

Non-IFRS Financial Measures

Certain financial measures in this MD&A, namely netback, lifting costs and EBITDA, are not prescribed, do not have a standardized meaning defined by IFRS and, therefore, may not be comparable with the calculation of similar measures by other companies.

EBITDA is a non-IFRS measure that refers to income (loss) before interest, income taxes, depletion, depreciation, amortization, accretion and other non-cash items that impact the income statement such as stock-based compensation and gains or losses from asset sales, foreign currency translations and impairments.

Netbacks are non-IFRS measures used by the Company as key indicators of performance and are not intended to represent operating profit nor should they be viewed as an alternative to cash flow provided by operating activities, net earnings or other measures of financial performance calculated in accordance with IFRS. A netback is a per barrel or thousand cubic feet (mcf) computation determined by deducting royalties, production expenses, transportation and selling expenses from the oil or gas sales price to measure the average net cash received from the barrels or mcf sold. Lifting costs are non-IFRS measures that include all production costs necessary to produce oil or gas, excluding severance taxes.

Please refer to the Abbreviations and Definitions section at the end of this document which lists abbreviations and definitions commonly referred to in the energy business and which may be used in this MD&A.

BUSINESS OVERVIEW

Overview of the Nine Months Ended September 30, 2018

Crude Oil Business Segment. The Company has one reportable business segment, development of crude oil and natural gas properties. Following the sale of substantially all the Company's oil and gas properties from the Transaction, the Company's operations consist primarily of activities and expenses related to evaluating future potential asset acquisitions.

Hunter Oil Corp.**Management's Discussion & Analysis for the Nine Months Ended September 30, 2018**

Subsidiaries and Operations. The operations of the Company include Hunter Oil Corp. (the Parent Company) and its wholly-owned subsidiaries. The following table lists the Company's principal subsidiaries, their jurisdiction of incorporation and its percentage ownership of their voting securities as of the date of this report:

Subsidiary Name	Jurisdiction	Company Ownership
Hunter Oil Management Corp.	Florida, USA	100%
Hunter Ventures Corp.	Delaware, USA	100%
Hunter Oil Resources Corp.	Delaware, USA	100%
Hunter Oil Production Corp.	Florida, USA	100%
Ridgeway Arizona Oil Corp. (1)	Arizona, USA	100%
EOR Operating Company (1)	Texas, USA	100%
Milnesand Minerals Inc. (2)	Delaware, USA	100%
Chaveroo Minerals Inc. (2)	Delaware, USA	100%
Hunter Ranch Corp.	Delaware, USA	100%

(1) Results of discontinued operations included to August 31, 2018 (See Note 15). Subsidiaries sold as disposal of discontinued operations.

(2) Results of discontinued operations. Assets and liabilities of each subsidiary sold as part of discontinued operations (See Note 15).

As previously noted, on August 31, 2018, certain subsidiaries of the Company sold substantially all the Company's oil and gas operations and related assets, for an aggregate purchase price of \$21.3 million, subject to certain post closing adjustments. The Purchaser also agreed to assume all retirement obligations associated with the Assets. As

Hunter Oil Corp.
Management's Discussion & Analysis for the Nine Months Ended September 30, 2018

a result of the sale, the results from operations of the Assets have been presented as discontinued operations. A summary of the results of operations up to the close of the Transaction are presented below. All other discussions and references herein to operations and expenses of the Company solely relate to the continuing operations of the Company. All comparative figures have been reclassified to reflect the continuing operations accordingly.

DISCUSSION OF OPERATIONS

Discontinued Operations

A summary of the results of operations up to the close of the Transaction are presented below.

The gain/loss on discontinued operations consists of the following:

	Nine Months Ended	
	September 30,	
Proceeds on sale	\$	21,593
Net book value of assets sold & liabilities assumed		33,930
Provisions for asset retirement obligation		(12,309)
Net Asset Value		<u>21,621</u>
Loss on sale of assets	\$	<u>(28)</u>

The results of discontinued operations are as follows:

	Nine Months Ended	
	September 30,	
	<u>2018</u>	<u>2017</u>
Revenues		
Oil and gas sales	\$ 1,442	\$ 1,185
Less: Royalties	(302)	(248)
Revenues, net of royalties	<u>1,140</u>	<u>937</u>
Expenses		
Operating and production costs	733	802
Workover expenses	225	49
General and administrative	2,447	965
Loss on disposition of assets	-	35
Depreciation and depletion	404	471
Accretion	277	329
Other, net	58	4
Stock-based compensation	472	-
Impairment loss	1,011	-
Total expenses	<u>5,627</u>	<u>2,655</u>
Net loss for the period	<u>\$ (4,487)</u>	<u>\$ (1,718)</u>
Loss from Discontinued Operations:		
Results from discontinued operations	\$ (4,487)	
Loss on disposal of assets	(28)	
Loss from discontinued operations	<u>\$ (4,515)</u>	

General and Administrative

General and administrative expenses for the periods ended September 30, 2018 and 2017, were as follows:

<i>(In thousands of US dollars)</i>	Nine Months Ended	
	September 30,	
Expense	2018	2017
Accounting, audit and tax advisory fees	\$ 78	\$ 56
Consulting fees	202	262
Insurance	37	-
Legal fees	77	30
Office and general	15	4
Public company expenses	58	34
Rent	14	66
Salaries, directors' fees and related benefits	18	21
Software and IT	1	-
Telephone and utilities	59	3
Total	\$ 559	\$ 476

(Note: Comparative figures have been reclassified to reflect the continuing operations)

General and administrative expenses increased approximately \$0.08 million, for the nine months ended September 30, 2018, compared 2017. The increase in costs was primarily due to additional audit, consulting and legal work performed during the period as well as additional administrative other costs that were previously shared with the discontinued operations.

Stock-Based Compensation

Stock-based compensation expense is a non-cash expense that is based on the fair values of stock options granted and amortized over the vesting periods of the options. During the third quarter of 2018, the Company recognized approximately \$0.10 million in stock-based compensation expense (being the aggregate of all stock-based compensation between continuing and discontinued operations) on the options that vested during the nine-month period ending September 30, 2018. The compensation expense was based on the estimated fair value of the options on the grant date in accordance with the fair value method of accounting for stock-based compensation.

In addition, the Company entered into agreements to cancel certain outstanding stock options in connection with the Transaction. The cancellation constitutes a share-based payment and as a result any cash payments made in excess of the previously vested and expensed stock-based compensation was expensed. The Company recorded an expense of \$0.5 million in relation to the settlement of stock options during the nine months ended September 30, 2018. As the settlement related to the sold operations these amounts have been included in discontinued operations.

Foreign Exchange Gain (Loss)

The Company's functional currency and presentational currency as determined under *International Accounting Standard ("IAS") 21, The Effects of Changes in Foreign Exchange Rates*, is the United States dollar. Presently, the majority of the Company's operating expenses and capital expenditures are paid in the United States dollar except for the revenue and expenses of the Canadian parent entity and all historical equity issuances of the Canadian parent which are denominated in Canadian dollars. There will continue to be an impact from currency translation and exchange gains and losses, but we believe this translation will have a small impact on our financial results. The average Canadian/US dollar exchange rate was \$0.766 and \$0.77 for the nine-month periods ended September 30, 2018 and 2017, respectively.

EBITDA Reconciliation

<i>(In thousands of US Dollars)</i>	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2018	2017	2018	2017

<i>Adjustments:</i>				
Loss from discontinued operations	2,422	429	4,515	1,718
Financing costs and other, net	53	-	49	(1)
Stock-based compensation	15	-	24	-
Foreign currency translation (gain) loss	(18)	19	(20)	20
EBITDA	\$ (194)	\$ (157)	\$ (559)	\$ (476)

LIQUIDITY AND CAPITAL RESOURCES

On March 13, 2018, the Company closed a non-brokered private placement of 5,000,000 common shares of the Company at a price of C\$0.40 per share to raise gross proceeds of C\$2.0 million (USD \$1.54 million).

The Company had unrestricted and restricted cash balances of \$3.9 million and \$.08 million, as of September 30, 2018 and 2017 respectively. Following the sale of its discontinued operation, the Company has \$1.9 million of working capital available as of September 30, 2018. During the period ended September 30, 2018, the Company declared a capital distribution of \$16.58 million at a price of \$1.25 per share. As of September 30, 2018, \$2.1 million of payments remain to be processed or cheques cashed.

The Company has sufficient cash to fund its current operations. However, the Company anticipates that additional property acquisitions or business development will require additional funding. The Company will consider all available sources of financing to develop such projects, including equity, bank and mezzanine debt, asset sales and joint venture arrangements.

While the unaudited interim condensed financial statements are prepared on the basis that the Company will continue to operate as a going concern, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the twelve-month period following the date of these consolidated financial statements, certain conditions and events cast significant doubt on the validity of this assumption. For the nine months ended September 30, 2018, the Company had negative cash flows from operations

Hunter Oil Corp.**Management's Discussion & Analysis for the Nine Months Ended September 30, 2018**

of approximately \$2.9 million and, at September 30, 2018, an accumulated deficit of approximately \$118 million. The Company also expects to incur further losses during the future development of its business. The Company's ability to continue as a going concern is dependent upon its ability identify a suitable target business or assets to generate profitable operations and to obtain additional funding from loans or equity financings or through other arrangements. Although the Company has been successful in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms acceptable to the Company.

DISCLOSURE OF CONTROLS, PROCEDURES AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

As a TSX Venture Exchange issuer, the Company's officers are not required to certify the design and evaluation of operating effectiveness of the Company's disclosure controls and procedures ("DC&P") or its internal controls over financial reporting ("ICFR"). The Company maintains DC&P designed controls to ensure that information required to be disclosed in reports filed or submitted is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In addition, the Chief Executive Officer and the Chief Financial Officer have designed controls over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with generally accepted accounting principles. Due to its size, the small number of employees, the scope of its current operations, its limited liquidity and capital resources, there are inherent limitations on the Company's ability to design and implement on a cost-effective basis the DC&P and ICFR procedures, the effect of which may result in additional risks related to the quality, reliability, transparency and timeliness of its interim filings and other reports. There have been no changes in ICFR during the nine months ended September 30, 2018.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have any special purpose entities nor is it party to any arrangements that would be excluded from the consolidated balance sheet.

RELATED PARTY TRANSACTIONS

During the nine months ended September 30, 2018, the Company incurred expenses from transactions with the three related parties identified below.

Century Capital Management

Pursuant to a management services agreement with Century Capital Management Ltd., a company controlled by the Company's Executive Chairman, the Company incurred approximately \$0.18 million and \$0.18 million in management fees, office rent and office expenses during the nine months ended September 30, 2018 and 2017, respectively. The services under the Agreement are provided at \$0.24 million per year, payable monthly. On July 27, 2018, in conjunction with the closing on the sale of the Company's discontinued operations, Century agreed to terminate its management services agreement effective September 30, 2018 and agreed to accept the sum of \$0.25 million in settlement of the change of control payment due under the agreement. In addition, the Executive Chairman agreed to surrender all stock options.

Al H. Denson

On June 15, 2018, the Company entered into a management services agreement with its new Chief Executive Officer to provide management consulting services for a period of two years after the effective date of the contract. Compensation for services under the agreement are provided at \$0.24 million per year, payable monthly. Mr. Denson was also granted 500,000 stock options. Pursuant to the agreement, the Company incurred approximately \$0.06 million in management fees during the nine months ended September 30, 2018.

On July 27, 2018, in conjunction with the closing on the sale of the Company's discontinued operations, Mr. Denson agreed to terminate the management services agreement effective September 30, 2018, to accept the sum of \$0.25 million in settlement of the certain change of control payments due under the agreement. In addition, Mr. Denson agreed to surrender 250,000 (50%) of his options. The Company subsequently entered into an agreement to purchase and cancel the remaining stock options (See Note 13) for an agreed upon amount of \$0.18 million.

Mark Strawn

On June 15, 2018, the Company entered into a management services agreement with its new Vice President to provide management consulting services for a period of two years after the effective date of the contract. Compensation for services under the agreement are provided at \$0.18 million per year, payable monthly. Mr. Strawn was also granted 250,000 stock options. Pursuant to the agreement, the Company incurred approximately \$0.05 million in management fees during the nine months ended September 30, 2018.

On July 27, 2018, in conjunction with the closing on the sale of the Company's discontinued operations, Mr. Strawn agreed to terminate the management service agreement effective September 30, 2018, and to accept the sum of \$0.25 million in settlement of the certain change of control payments due under the agreement. The Company subsequently entered into an agreement to purchase and cancel the remaining stock options (See Note 13) for an agreed upon amount of \$0.18 million.

CRITICAL ACCOUNTING ESTIMATES

Estimates and underlying assumptions are reviewed on an ongoing basis and involve significant estimation uncertainty which have a significant risk of causing adjustments to the carrying amounts of assets and liabilities. Revisions to accounting estimates are recognized in the year in which the estimates are reviewed and for any future years affected. Significant judgments, estimates and assumptions made by management in the consolidated financial statements are outlined below:

Oil and natural gas reserves: Certain depletion, depreciation, impairment and asset retirement obligation charges are measured based on the Company's estimate of proved and probable oil and gas reserves and resources. The estimation of proved and probable reserves and resources is an inherently complex process and involves the exercise of professional judgment.

Oil and natural gas reserve estimates are based on a range of geological, technical and economic factors, including projected future rates of production, estimated commodity prices, engineering data, and the timing and amount of future expenditures, all of which are subject to uncertainty. Assumptions reflect market and regulatory conditions existing at the reporting date, which could differ significantly from other points in time throughout the year, or future periods. Changes in market and regulatory conditions and assumptions can materially impact the estimation of net reserves and resources.

Impairment of assets: The Company evaluates its assets for possible impairment at the CGU level. The determination of CGUs requires judgment in defining the smallest grouping of integrated assets that generate identifiable cash inflows that are largely independent of the cash inflows of other assets or groups of assets. The allocation of assets into CGUs has been determined based on similar geological structure, shared infrastructure, geographical proximity, commodity type, the existence of active markets, similar exposure to market risks, and the way in which management monitors the operations.

The recoverable amounts of CGUs and individual assets have been determined based on the higher of fair value less costs of disposal model and value in-use model. The key assumptions the Company uses in estimating future cash flows for recoverable amounts are: anticipated future commodity prices, expected production volumes, future operating and development costs, estimates of inflation on costs and expenditures, expected income taxes and discount rates. In addition, the Company considers the current environmental, social and governance issues affecting its property interests and operations, including the current legislative and regulatory activity affecting the permitting and approval of its projects and operations. Changes to these assumptions will affect the estimated recoverable amounts attributed to a CGU or individual assets and may then require a material adjustment to their related carrying value.

The decision to transfer exploration and evaluation assets to property and equipment is based on management's determination of a property's technical feasibility and commercial viability based on proved and probable reserves as well as related future cash flows.

Judgements are required to assess when impairment indicators exist, and impairment testing is required. In determining the recoverable amount of assets, in the absence of quoted market prices, impairment tests are based on estimates of reserves, production rates, future oil and natural gas prices, future costs, discount rates, market value of land and other relevant assumptions.

The application of the Company's accounting policy for exploration and evaluation assets requires management to make certain judgements as to future events and circumstances as to whether economic quantities of reserves will be found to assess if technical feasibility and commercial viability has been achieved.

Judgements are made by management to determine the likelihood of whether deferred income tax assets at the end of the reporting period will be realized from future taxable earnings.

Asset retirement obligations: The Company estimates and recognizes liabilities for future asset retirement obligations and restoration of exploration and evaluation assets, and for crude oil development and producing assets. These provisions are based on estimated costs, which take into account the anticipated method and extent of restoration, technological advances and the possible future use of the asset. Actual costs are uncertain and estimates can vary as a result of changes to relevant laws and regulations, the emergence of new restoration techniques, operating experience and prices. The expected timing of future retirement and restoration may change due to these factors, as well as affect the estimates of reserve life. Changes to assumptions related to future expected costs, discount rates and timing may have a material impact on the amounts presented. Following the sale of its discontinued operations the Company currently has no estimate asset retirement obligations.

NEW ACCOUNTING STANDARDS

IFRS 9: Financial Instruments

The complete version of *IFRS 9* was issued in July 2014. It replaced guidance in *IAS 39, Financial Instruments: Recognition and Measurement*, that relates to the classification and measurement of financial instruments. *IFRS 9* retains, but simplifies, the mixed measurement model and establishes three primary measurement categories for financial assets: amortized cost, fair value through other comprehensive income (OCI) and fair value through profit and loss (P&L). The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in OCI not recycling. There is now a new expected credit losses model that replaces the incurred loss impairment model used in *IAS 39*. For financial liabilities, there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value through profit or loss. *IFRS 9* relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and hedging instrument and for the "hedged ratio" to be the same as the one management actually uses for risk management purposes. Contemporaneous documentation is still required but is different to that currently prepared under *IAS 39*. Hunter Oil retrospectively adopted *IFRS 9* on January 1, 2018. Due to the short-term and/or liquid nature of its financial assets and financial liabilities, the adoption had no impact on the amounts recognized in the Company's unaudited interim condensed consolidated financial statements for the nine months ended September 30, 2018.

IFRS 15: Revenue from Contracts with Customers

IFRS 15 deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognized when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. In accordance with *IFRS 15*, the Company recognizes revenue when it satisfies a performance obligation (when control of the commodities is transferred to the purchaser). The standard replaces *IAS 18, Revenue*, and *IAS 11, Construction Contracts*, and related

interpretations. On January 1, 2018, Hunter Oil adopted *IFRS 15* using the modified retrospective approach with a practical expedient that allows the Company to avoid re-considering the accounting for any sales contracts that were completed prior to the adoption date and were previously accounted for under *IAS 18*. The adoption had no impact on the Company's unaudited interim condensed consolidated financial statements for the nine months ended September 30, 2018.

FUTURE ACCOUNTING PRONOUNCEMENTS

The following new standards and amendments to standards and interpretations are effective for annual periods beginning after January 1, 2019, and have not been applied in preparing these financial statements.

IFRS 16: Leases

This new standard replaces *IAS 17, Leases*, and the related interpretative guidance. *IFRS 16* applies a control model to the identification of leases, distinguishing between a lease and a service contract on the basis of whether the customer controls the asset being leased. For those assets determined to meet the definition of a lease, *IFRS 16* introduces significant changes to the accounting by lessees, introducing a single, on-balance sheet accounting model that is similar to current finance lease accounting, with limited exceptions for short-term leases or leases of low value assets. Lessor accounting is not substantially changed. The standard is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted for entities that have adopted *IFRS 15*. The Company has not fully assessed the impact of *IFRS 16* on the financial statements, but does not expect the impact to be significant.

There are no other IFRS or IFRIC interpretations that are not yet effective that would be expected to have a material impact on the Company.

POTENTIAL RISKS AND UNCERTAINTIES

The resource industry is highly competitive and, in addition, exposes the Company to a number of risks. Resource exploration and development involves a high degree of risk, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. It is also highly capital intensive and the ability to complete a development project may be dependent on the Company's ability to raise additional capital. In certain cases, this may be achieved only through joint ventures or other relationships, which would reduce the Company's ownership interest in the project. There is no assurance that development operations will prove successful. Readers are referred to the discussion of Potential Risks and Uncertainties in the Company's MD&A for the year ended December 31, 2017.

Hunter Oil Corp.
Management's Discussion & Analysis for the Nine Months Ended September 30, 2018

As at November 27, 2018 the Company has no stock options outstanding. A summary of the stock option activity during the nine months ended September 30, 2018 is as follows:

	Number of Options	Weighted-Average Exercise Price (C\$)
Oustanding, December 31, 2017	-	
Granted	1,250	\$ 0.80
Exercised	(190)	0.80
Cancelled	(1,060)	0.80
Oustanding, September 30, 2018	-	

Forward-Looking Statements

Certain statements contained in this Management's Discussion and Analysis and in certain documents incorporated by reference into this Management's Discussion and Analysis contain estimates and assumptions which management are required to make regarding future events and may constitute forward-looking statements within the meaning of applicable securities laws. Management's assessment of future operations, drilling and development plans and timing thereof, other capital expenditures and timing thereof, methods of financing capital expenditures and the ability to fund financial liabilities, expected commodity prices and the impact on the Company and the impact of the adoption of future changes in accounting standards may constitute forward-looking statements under applicable securities laws and necessarily involve risks including, without limitation, risks associated with oil and gas exploration, development, exploitation, the flexibility of capital funding plans and the source of funding therefore; production, marketing and transportation, loss of markets, volatility of commodity prices, the effect of the Company's risk management program, including the impact of derivative financial instruments; currency fluctuations, imprecision of reserve estimates, environmental risks, competition from other producers, inability to retain drilling rigs and other services, incorrect assessment of the value of acquisitions, failure to realize the anticipated benefits of acquisitions, the inability to fully realize the benefits of the acquisitions, delays resulting from or inability to obtain required regulatory approvals and ability to access sufficient capital from internal and external sources.

All statements other than statements of historical fact may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe" and similar other expressions. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. The Company believes that the expectations reflected in these forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in, or incorporated by reference into, this MD&A should not be unduly relied upon. These statements speak only as of the date of this MD&A as the case may be. The Company does not intend, and does not assume an obligation, to update these forward-looking statements, except as required by securities law.

In particular, this MD&A and the documents incorporated by reference include, but are not limited to, forward-looking statements pertaining to the following:

- the quantity of reserves and contingent resources;
- crude oil operations and production levels;

- capital expenditure programs, including drilling programs, asset retirement and abandonment activities and pipeline construction projects, and the timing and method of financing thereof;
- projections of market prices and costs;
- supply, demand and pricing for crude oil;
- expectations regarding the Company's ability to raise capital and to continually add to reserves through acquisitions and development
- drilling inventory, drilling plans and timing of drilling, re-completion and tie-in of wells;
- plans for production facilities construction and completion and the timing and method of funding thereof;
- productive capacity of wells, anticipated or expected production rates and anticipated dates of commencement of production;
- drilling, completion and facilities costs;
- results of various projects of the Company;
- timing of receipt of regulatory approvals;

- timing and effect of production increases and the related effect and timing on operating costs per BOE;
- ability to lower cost structure in certain projects of the Company;
- growth expectations within the Company;
- timing of development of undeveloped reserves;
- the tax horizon and tax related implications of the Company;
- supply and demand for oil;
- the performance and characteristics of the Company's oil and natural gas properties;
- the Company's acquisition strategy, the criteria to be considered in connection therewith and the benefits to be derived therefrom;
- the impact of federal and state governmental regulation on the Company, either directly or relative to other oil and gas issuers of similar size;
- realization of the anticipated benefits of acquisitions and dispositions;
- weighting of production between different commodities;
- expected levels of royalty rates, production and workover costs, office field expenses, general and administrative costs, costs of services and other costs and expenses
- benefits or costs related to settlement of financial instruments; and
- treatment under government regulation and taxation, including hydrocarbon taxation regimes

This forward-looking information is based on a number of assumptions and factors, including, but not limited to, the following:

- assumptions set out herein and in the Company's most recently filed Form 51-101F1 oil and gas report;
- stability in the credit markets and continued willingness of lenders to lend capital to issuers such as the Company;
- continuing availability of funds for capital expenditures through internally generated cash and/or equity raises and debt raises;
- stability of political and fiscal regimes in the countries in which the Company operates;
- ability of the Company to hold mineral leases and projects in which it has interests and to find suitable industry partners to assume or share capital expenditure requirements necessary to keep various of the Company's projects in good standing, if and as needed;
- stable future costs;
- availability of equipment and personnel when required for operations;
- future strong demand for oil;

- that the Company will not experience unforeseen delays, unexpected geological, environmental or other natural occurrences, equipment failures, permitting delays or delays in procurement of required equipment or personnel;
- that the Company will not experience labor or contract disputes;
- that the Company's financial condition and development plans and those of its co-venturers will not substantially change;
- the assumptions underlying reserve estimates;
- that indications of early results are reasonably accurate predictors of the prospectiveness of the hydrocarbon bearing strata;
- that environmental and other regulations affecting the Company will not substantially change and that required regulatory approvals will be available when required;
- that expected production from future wells can be achieved as modeled and that declines will match the modeling;
- that rates of return as modeled can be achieved;
- that reserve recoveries are consistent with management's expectations;
- that additional wells are actually drilled and completed;
- expectations and assumptions regarding future growth, results of operations, production, future capital and other expenditures (including the amounts, nature and sources of funding thereof);
- plans for, and results of, drilling activities; and
- assumptions regarding business prospects and opportunities.

Although the Company believes that the expectations reflected in the forward-looking statements are reasonable, there can be no assurance that such expectations will prove to be correct. The Company cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither the Company nor any other person assumes responsibility for the outcome of the forward-looking statements. Many of the risks and other factors are beyond the Company's control, which could cause actual results to differ materially from those anticipated in these forward-looking statements as a result of risk factors as set forth, but not limited to, those below and elsewhere in this MD&A:

- volatility in market prices for oil;
- liabilities and risks inherent in oil operations;
- uncertainties associated with estimating reserves;
- competition for capital, acquisitions of reserves, undeveloped lands and skilled personnel;
- incorrect assessments of the value of acquisitions;
- incorrect assessments of the recoverability of asset costs and investments;
- geological, technical, drilling and processing problems; and
- governmental, regulatory and taxation regimes.

ABBREVIATIONS AND DEFINITIONS

Crude Oil and Natural Gas Liquids

Carbon Dioxide and Natural Gas

Bbl	barrel	Bcf	billion cubic feet
Bbls	barrels	Mcf	thousand cubic feet
BBls/d	barrels per day	MMcf	million cubic feet
BOEPD	barrel of oil equivalent per day	Mcf/d	thousand cubic feet per day
MMbbls	million barrels	MMcf/d	million cubic feet per day
Mbbls	thousand barrels	Tcf	trillion cubic feet
Boe	Barrel of oil equivalent of natural gas and crude oil on the basis of one Boe for six Mcf of natural gas and one Boe for forty- two gallons of plant products (these conversion factors are industry accepted norms and are not based on either energy content or current prices).		
Contingent resource	Those quantities of petroleum which are estimated, on a given date, to be potentially recoverable from known accumulations, but which are not currently considered to be commercially recoverable.		
EBITDA	Income or loss before income taxes, depletion, depreciation, amortization and accretion and often referred to as 'cash flow from operations'		
MBoe	1,000 barrels of oil equivalent		
Net revenue	Gross revenue less all taxes, royalties and lease operating expenses.		
NI 51-101	National Instrument 51-101 <i>Standards of Disclosure for Oil and Gas Activities</i> adopted by the Canadian Securities Administrators.		
Primary recovery	Production in which only existing natural energy sources in the reservoir provide for movement of well fluids.		
Permian Basin	A large crude oil and natural gas producing area representing a sedimentary basin dating from the Permian geologic period and covering an area extending from West Texas to eastern New Mexico.		
Reserves	Estimated remaining quantities of oil and natural gas and related substances anticipated to be recoverable from known accumulations from a given date forward based on (i) analysis of drilling, geophysical and engineering data; (ii) the use of established technology; (iii) specified economic conditions, which are generally accepted as being reasonable, and shall be disclosed; and (iv) a remaining reserve life of 50 years. These definitions and disclosures are in accordance with the definitions, procedures and standards contained in the Canadian Oil and Gas Evaluation (COGE) Handbook and the Canadian Securities Administrators NI 51-101.		
\$	United States dollars		
C\$	Canadian dollars
